

Name: Chalamala Sai Harshitha

Reg No.: 192424346

Experiment 1:

FIND-S Algorithm

Code:

```
import pandas as pd
df = pd.read_csv("training.csv")
h = None
for row in df.values:
    x = row[:-1].tolist()
    y = row[-1]
    if y == "Yes":
        if h is None:
            h = x[:]
        else:
            for i in range(len(h)):
                if h[i] != x[i]:
                    h[i] = "?"
print("Final Hypothesis:")
print(h)
```

Output:

```
>>> |===== RESTART: C:\Users\saiha\Downloads\lab.py =====|
      |Final Hypothesis:|
      |['Sunny', 'Warm', '?', 'Strong', '?', 'Same']|
>>> |
```
